Wyzz Medical

INTRODUCTION

At Wyzz Medical, we pride ourselves on delivering top-tier disposable products that meet the highest standards of quality and safety. Our commitment to excellence extends beyond products to include exceptional service, ensuring your needs are met with professionalism and care. Rest assured, our offerings conform to custom ISO standards and regulations, guaranteeing compliance and peace of mind for all your medical requirements.

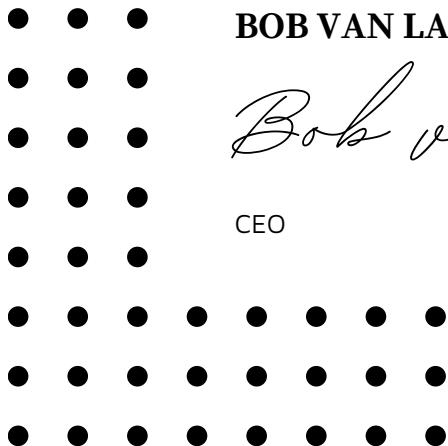

Furthermore, our dedication to customer satisfaction extends beyond product quality to encompass unparalleled service. Our knowledgeable and friendly staff are here to assist you every step of the way, from product selection to post-purchase support. Whether you have questions about product specifications or need assistance with order processing, we're committed to providing prompt and effective solutions tailored to your needs. At Wyzz Medical, we prioritize building lasting relationships with our customers by delivering exceptional service that exceeds expectations. With us, you can trust that your healthcare needs are in capable hands, ensuring peace of mind and confidence in every interaction.

Sincerely,

BOB VAN LAERE

CEO

Wyzz Medical

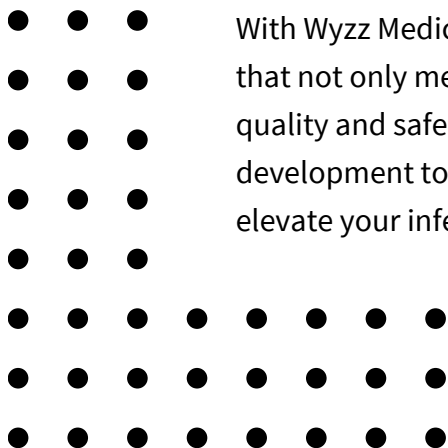

ENSURING SAFETY THROUGH QUALITY DISPOSABLE PRODUCTS

In the ever-evolving landscape of healthcare, the importance of high-quality personal protective equipment (PPE) and disposable products cannot be overstated. These essential items serve as the frontline defence against pathogens, safeguarding both healthcare professionals and patients alike. At Wyzz Medical, we recognize the critical role that these products play in infection prevention and control. That's why we're committed to providing a comprehensive range of disposable solutions that meet the highest standards of quality and reliability.

www.wyzzmedical.com

With Wyzz Medical, you can trust that you're receiving PPE and disposable products that not only meet but exceed industry standards. Our unwavering dedication to quality and safety underscores every aspect of our operations, from product development to customer service. Experience the Wyzz Medical difference today and elevate your infection control measures with confidence.

Wyzz Medical

COMMITMENT TO QUALITY AND VALUE

At Wyzz Medical, our management team boasts decades of collective experience in the healthcare industry. Led by visionary leaders with a global network and deep connections in the medical field, we are well-equipped to navigate the ever-evolving landscape of healthcare.

In addition to quality, we understand the importance of competitive pricing in today's market. That's why we strive to offer cost-effective solutions without compromising on quality or reliability. With Wyzz Medical, you can trust that you're getting the best value for your investment.

With Wyzz Medical, you're not just getting products —you're getting a partner you can rely on. Our experienced team, global network, and commitment to quality and value set us apart in the medical field. Experience the Wyzz Medical difference today and discover why we're a trusted name in healthcare worldwide.

Elastic Adhesive Bandage

YD441

Elastic Adhesive Bandage is a versatile medical tape used for supporting injured muscles and joints during physical activity or rehabilitation. Its elastic properties provide comfortable compression and flexibility, promoting optimal movement and stability for effective injury management.

Composition 80% Cotton, 15% Spandex.

Specification Common Sizes or Custom Sizes.

Product #

Benefits Comfortable compression and flexibility, supporting injured muscles and joints during physical activity or rehabilitation.

Hydrogel Cold Bandage

YD790

Hydrogel Cold Bandage is a therapeutic wrap designed to provide targeted relief for pain and swelling associated with injuries or inflammation. Its hydrogel formulation delivers cooling therapy, promoting comfort and reducing inflammation for effective recovery.

Composition 80% Cotton, 15% Spandex.

Specification 7.5cm x 3.2m, 7.5cm x 3.5m, 10cm x 2.7m, 10cm x 3.2m

Product #

Benefits Targeted relief, reduces pain and swelling, aiding in recovery from injuries or inflammation for up to 2 hours.

Cold Bandages

YD780

Cold bandages provide localized relief for pain and swelling, making them ideal for treating injuries and inflammation. Their cooling effect helps soothe discomfort and promote healing, enhancing recovery after injuries or strains.

Composition

Specification 7.5cm x 3.2m, 7.5cm x 3.5m, 10cm x 2.7m, 10cm x 3.2m

Product #

Benefits Targeted relief, reducing pain and swelling, facilitating faster recovery from injuries and inflammation up to 2 hours.

Crepe Elastic Bandage

YD110/YD110R/YD110B/YD110RB/YD112
YD112R/YD112B/YD113/YD114

Crepe Elastic Bandage is a versatile medical wrap used for providing compression and support to injured limbs. Its elastic and breathable fabric offers comfortable wear, promoting effective recovery from sprains, strains, and other injuries.

Composition 80% Cotton, 20% Spandex.

Specification 5cm ,7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Provides compression and support, aiding in recovery from sprains, strains, and other injuries effectively.

Crepe Elastic Bandage

YD110/YD110R/YD110B/YD110RB/YD112
YD112R/YD112B/YD113/YD114

Crepe Elastic Bandage is a versatile medical wrap used for providing compression and support to injured limbs. Its elastic and breathable fabric offers comfortable wear, promoting effective recovery from sprains, strains, and other injuries.

Composition 55% Cotton, 45% Spandex.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Provides compression, support, and comfort for effective recovery from sprains, strains, and other injuries.

Spandex Tabby Bandage

YD120/YD121

Spandex Tabby Bandage is a flexible and lightweight wrap used for providing compression and support to injured areas. Its stretchable fabric and adhesive tabs ensure secure fixation, aiding in the effective management of sprains, strains, and other injuries.

Composition 55% Cotton, 45% Spandex.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Lightweight, stretchable fabric with adhesive tabs, provides secure compression and support for injury management.

Conforming Bandage

YD210/YD210C

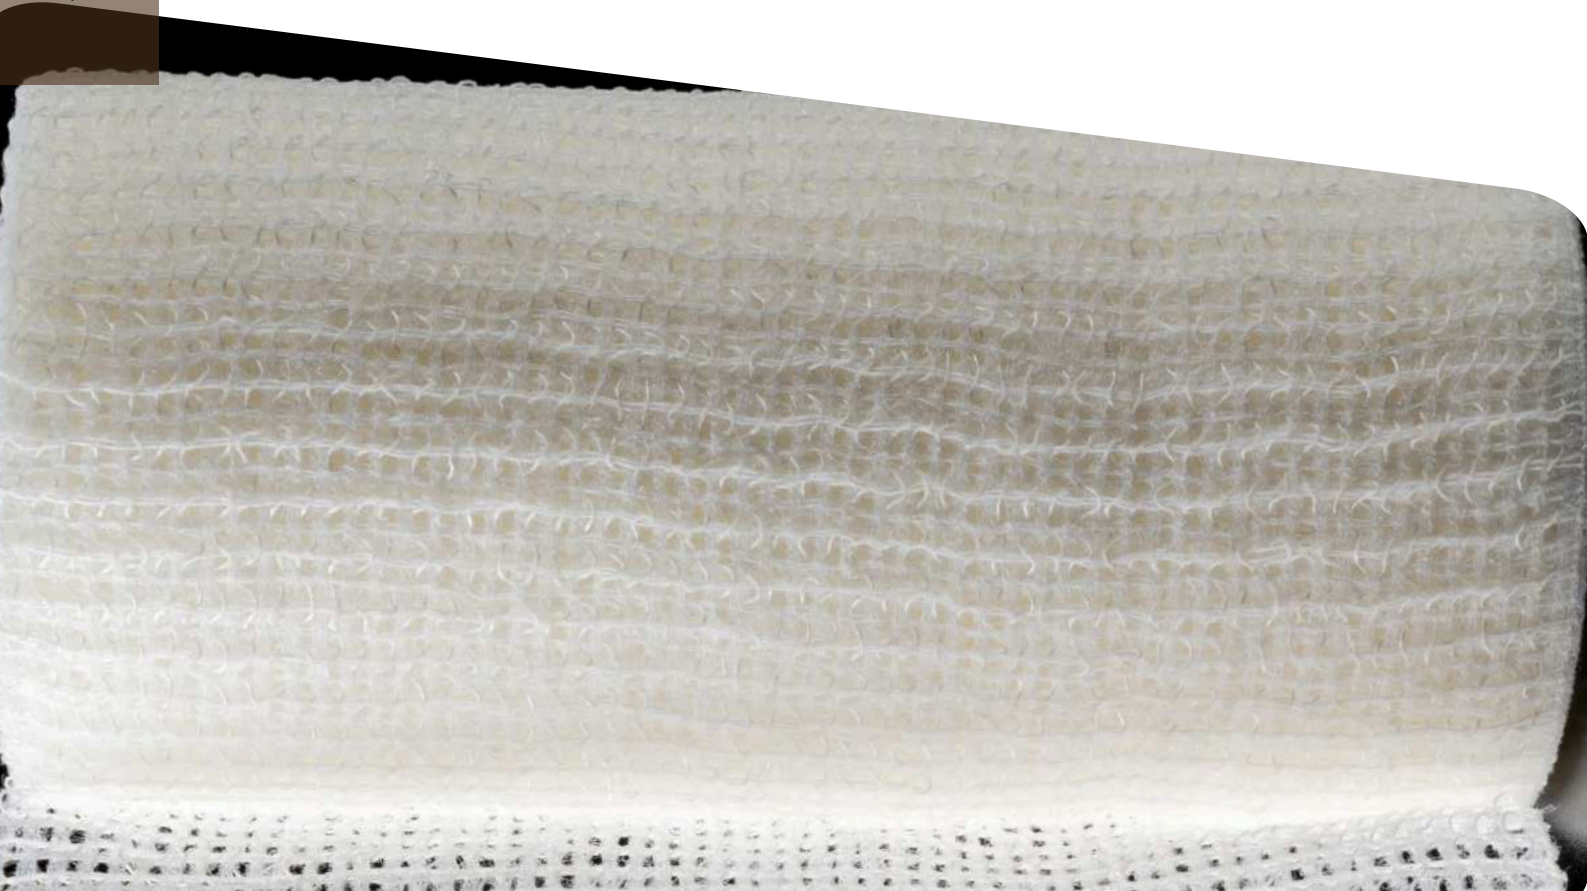

Conforming Bandage is a flexible and stretchable wrap used for securing wound dressings and providing light compression. Its conformable nature ensures a snug fit to body contours, promoting comfort and effective wound management.

Composition 55% Cotton, 45% Viscose.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Flexible and stretchable, ensures snug fit, promotes comfort and effective wound management with light compression.

Universal Elastic Fixation Bandage

YD220/YD221/YD222

Universal Elastic Fixation Bandage is a versatile medical wrap designed for securing dressings and providing compression to various body parts. Its elastic and adhesive properties ensure a secure and comfortable fit, making it suitable for a wide range of applications in wound care and support.

Composition 65% Cotton, 35% Polyester or 65% Cotton, 35% Polyamide.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Versatile, elastic and adhesive properties ensure secure and comfortable fit for various wound care applications.

Deluxe/Knitting Conforming Bandage

YD230

The Deluxe/Knitting Conforming Bandage is a premium-quality, flexible wrap ideal for securing wound dressings with superior conformability. Its knitted construction provides enhanced elasticity and durability, ensuring optimal comfort and effective wound management.

Composition 70% Polyester, 30% Viscose.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Premium-quality, knitted construction offers superior elasticity, durability, and comfort for effective wound management.

High Elastic Bandage/Latex

YD310/YD/311/YD312/YD315/YD316/YD317/YD318

High Elastic Bandage/Latex is a stretchable wrap used for providing strong compression and support to injured limbs. Its latex material offers superior elasticity, ensuring a secure fit and effective management of sprains, strains, and other injuries.

Composition 72% Polyester, 28% Latex.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Offers strong compression, superior elasticity, ensuring secure fit and effective management of sprains and strains.

Latex Free Elastic Bandage

YD320

Latex-Free Elastic Bandage is a stretchable wrap ideal for providing compression and support without the risk of latex allergies. Its latex-free material ensures safe and comfortable wear, making it suitable for individuals with sensitivities or allergies to latex.

Composition 72% Polyester, 28% Latex.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Provides compression and support, safe and comfortable for latex-sensitive individuals, ensuring effective injury management.

Acrylic Elastic Bandage

YD321

Acrylic Elastic Bandage is a durable and stretchable wrap used for providing compression and support to injured areas. Its acrylic material offers excellent elasticity and resilience, ensuring effective injury management and comfortable wear.

Composition 55% Acrylic Yarn, 25% Rubber, 20% Polyester.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m

Product #

Benefits Durable, stretchable, provides excellent elasticity and resilience, ensuring effective injury management and comfortable wear.

Cotton High Elastic Bandage(Latex)

YD330

Cotton High Elastic Bandage with Latex is a stretchable wrap crafted from cotton and latex for strong compression and support. Its blend of materials offers superior elasticity, making it ideal for managing sprains, strains, and other injuries effectively.

Composition 58% Cotton, 25% Polyamide, 17% Latex.

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Offers strong compression, superior elasticity, ensuring effective management of sprains, strains, and injuries.

Cotton High Elastic Bandage/Latex Free

YD331

Cotton High Elastic Bandage/Latex-Free is a stretchable wrap made from cotton without latex, providing compression and support. Its latex-free composition ensures safety and comfort for individuals with latex allergies, ideal for managing injuries effectively.

Composition 74% Cotton, 18% Polyamide, 8% Spandex.

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Provides compression, support, and safety for individuals with latex allergies, ensuring effective injury management.

Self Closure Bandage

YD340

Self Closure Bandage is a convenient medical wrap equipped with self-adhesive closure tabs for easy application and removal. Its adjustable and reusable design provides secure compression and support, making it ideal for various wound management and support needs.

Composition 52% Cotton, 20% Spandex, 38% Latex.

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Convenient self-adhesive tabs, adjustable and reusable design, providing secure compression and support for wound management.

Elastic Bandage

YD350

Elastic Bandage is a flexible wrap used for providing compression and support to injured limbs or joints. Its stretchable material ensures a snug fit, promoting effective recovery from sprains, strains, and other injuries.

Composition 68% Cotton, 22% Polyester, 10% Latex.

Specification 8 cm, 10cm, x 1.5m, 2m, 2.5m, 3m, 4m, 5m

Product #

Benefits Flexible material provides compression and support, aiding in recovery from sprains, strains, and injuries.

Tubular Gauze Bandage

YD512

Tubular Gauze Bandage is a seamless, stretchable tube used for securing dressings or providing light compression to limbs. Its breathable and soft fabric ensures comfort and easy application, making it suitable for various wound management needs.

Composition 100% Cotton or 100% Polyester.

Specification 1cm, 1.5cm, 2cm, 2.5cm x 20m

Product #

Benefits Seamless, stretchable, breathable fabric offers comfort and easy application, ideal for various wound management needs.

Stockinette Polyester

YD513

Stockinette Polyester is a tubular, knitted fabric used for protecting skin or providing padding under casts or bandages. Its soft and breathable material ensures comfort and reduces the risk of skin irritation, making it ideal for orthopedic and wound care applications.

Composition 100% Polyester

Specification 5cm, 7.5cm, 10cm, 15cm x *m

Product #

Benefits Tubular, soft, breathable fabric provides comfort and padding, reducing skin irritation for orthopedic and wound care.

Stockinette Cotton

YD514

Stockinette Cotton is a tubular, knitted fabric made from cotton, used for protecting skin or providing padding under casts or bandages. Its soft and breathable material ensures comfort and reduces the risk of skin irritation, making it ideal for orthopedic and wound care applications.

Composition 100% Cotton

Specification 5cm, 7.5cm, 10cm, 15cm x *m

Product #

Benefits Tubular, soft, breathable fabric offers comfort and padding, reducing skin irritation for orthopedic and wound care.

Elastic Tubular Bandage

YD510

Elastic Tubular Bandage is a stretchable, seamless tube used for providing light compression and support to limbs or joints. Its flexible and breathable design ensures comfort and easy application, making it suitable for various wound management needs.

Composition 82% Cotton, 18% Rubber

Specification 4.5cm, 6.25cm, 6.75cm, 7.5cm, 8.75cm, 10cm, 12cm, 17.5cm, 21.5cm, 32.5 x *m

Product #

Benefits Seamless, stretchable, breathable design provides comfort and support, ideal for various wound management needs.

Tubular Net Bandage

-

Tubular Net Bandage is a stretchable, net-like tube used for securing wound dressings or providing light compression to limbs. Its breathable and soft material ensures comfort and easy application, making it suitable for various wound management needs.

Composition Yarn Material

Specification 0.8cm, 1.7cm, 2.cm, 2.3cm, 2.7cm, 3cm, 3.5cm, 4.2cm, 5.8cm, 7.2cm, 8.5cm x 25m

Product #

Benefits Stretchable, breathable fabric offers comfort and secure dressing fixation, ideal for wound management needs.

Conforming Pressure Bandage

YD610/YD610-3

Conforming Pressure Bandage is a stretchable and flexible wrap used for applying pressure to wounds or securing dressings. Its conformable nature ensures a snug fit, promoting effective wound management and compression therapy.

Composition Conforming bandage and non-sticky pad

Specification 5cm, 7.5cm, 10cm, 15cm x 4m or custom

Product #

Benefits Stretchable wrap applies pressure, promotes wound management and compression therapy, ensuring effective treatment.

Trauma/Emergency Bandage

YD612/YD613

Trauma/Emergency Bandage is a versatile medical dressing designed for quickly and efficiently treating severe wounds or injuries. Its integrated pressure applicator and sterile dressing facilitate rapid application, making it ideal for emergency situations in both civilian and military settings.

Composition High elastic bandage and non-sticky pad.

Specification 5cm, 7.5cm, 10cm, 15cm x 4m or custom

Product #

Benefits Rapid application, integrated pressure applicator, sterile dressing, ideal for treating severe wounds or injuries effectively.

Tourniquet CAT

-

The Tourniquet CAT (Combat Application Tourniquet) is a life-saving device used to stop severe bleeding in emergency situations. Its simple and effective design enables rapid application, providing crucial hemorrhage control in both civilian and military settings.

Composition Nylon

Specification 3.8cm x 96cm

Product #

Benefits Rapid application, life-saving device, stops severe bleeding, crucial hemorrhage control in emergency situations.

Tourniquet Disposable

-

The Disposable Tourniquet is a single-use device used to temporarily restrict blood flow during medical procedures or emergencies. Its disposable nature ensures hygiene and convenience, providing an effective solution for quick and safe blood flow control.

Composition Cotton. Rubber or Latex

Specification 2.5cm x 35cm, 40cm

Product #

Benefits Hygienic, convenient, provides quick and safe blood flow control for medical procedures or emergencies.

Orthopedic Cast Padding

YD620/YD621/YD622

Orthopedic Cast Padding is a soft and cushioning material used underneath casts to protect the skin and provide comfort. Its breathable and moisture-wicking properties help prevent skin irritation and promote healing during the immobilization period.

Composition Polyester or Cotton or Viscose.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 2,7m or custom

Product #

Benefits Soft, cushioning, breathable material protects skin, promotes comfort and healing during the immobilization period.

Plaster of Paris Bandage

YD630

Plaster of Paris Bandage is a medical wrap infused with gypsum powder, used for immobilizing and supporting fractures. Its quick-setting properties and moldability make it ideal for creating custom casts, ensuring effective immobilization and support for injured limbs.

Composition Cotton and plaster of paris.

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 2.7m, 3m, 4.5m or custom

Product #

Benefits Quick-setting, moldable, ensures effective immobilization and support for fractures, promoting efficient healing.

Vaseline Gauze

YD710/YD720/YD730

Vaseline Gauze is a sterile dressing impregnated with petroleum jelly, used to protect and promote wound healing. Its occlusive nature helps maintain a moist wound environment, preventing wound drying and facilitating tissue repair.

Composition Cotton gauze with Vaseline

Specification 10xm x 10cm Gauze, 10cm x 8m Bandage.

Product #

Benefits Sterile, occlusive dressing with petroleum jelly, promotes wound healing by maintaining a moist environment.

Gauze Swab (Sterile/Non-Sterile)

YD743-1/YD743-2

Gauze Swab, available in sterile or non-sterile options, is a versatile medical pad used for wound cleaning and dressing. It's absorbent and lint-free design ensures effective wound management, making it suitable for various healthcare applications. And is available in different variants in the form of mesh sizes and layer composition..

Composition 100% Cotton.

Specification 5.08cm x 5.08cm, 7.62cm x 7.62cm, 10.16cm x 10.16cm, 10.16cm x 20.32cm

Product #

Benefits Absorbent, lint-free design for effective wound cleaning and dressing, suitable for diverse healthcare applications.

Fluffy Gauze

YD741

Fluffy Gauze is a soft and absorbent dressing used for wound cleaning and padding. Its fluffy texture ensures gentle application and effective absorption, promoting optimal wound care and comfort.

Composition 100% Cotton.

Specification 11.43cm x 3.74m or 8.63cm x 3.29m

Product #

Benefits Soft, absorbent texture ensures gentle wound care, effective cleaning, and padding for optimal comfort.

Absorbent Gauze

YD742-2

Absorbent Gauze is a versatile medical dressing used for wound cleaning, packing, and covering. Its high absorbency ensures effective fluid management, promoting optimal wound healing and hygiene. And is available in 2 and 4ply and zigzag fold.

Composition 100% Cotton

Specification 36 x 100, 36 x -

Product #

Benefits Versatile dressing for wound cleaning, packing, and covering, ensuring effective fluid management and optimal healing.

Side Woven Gauze

YD740

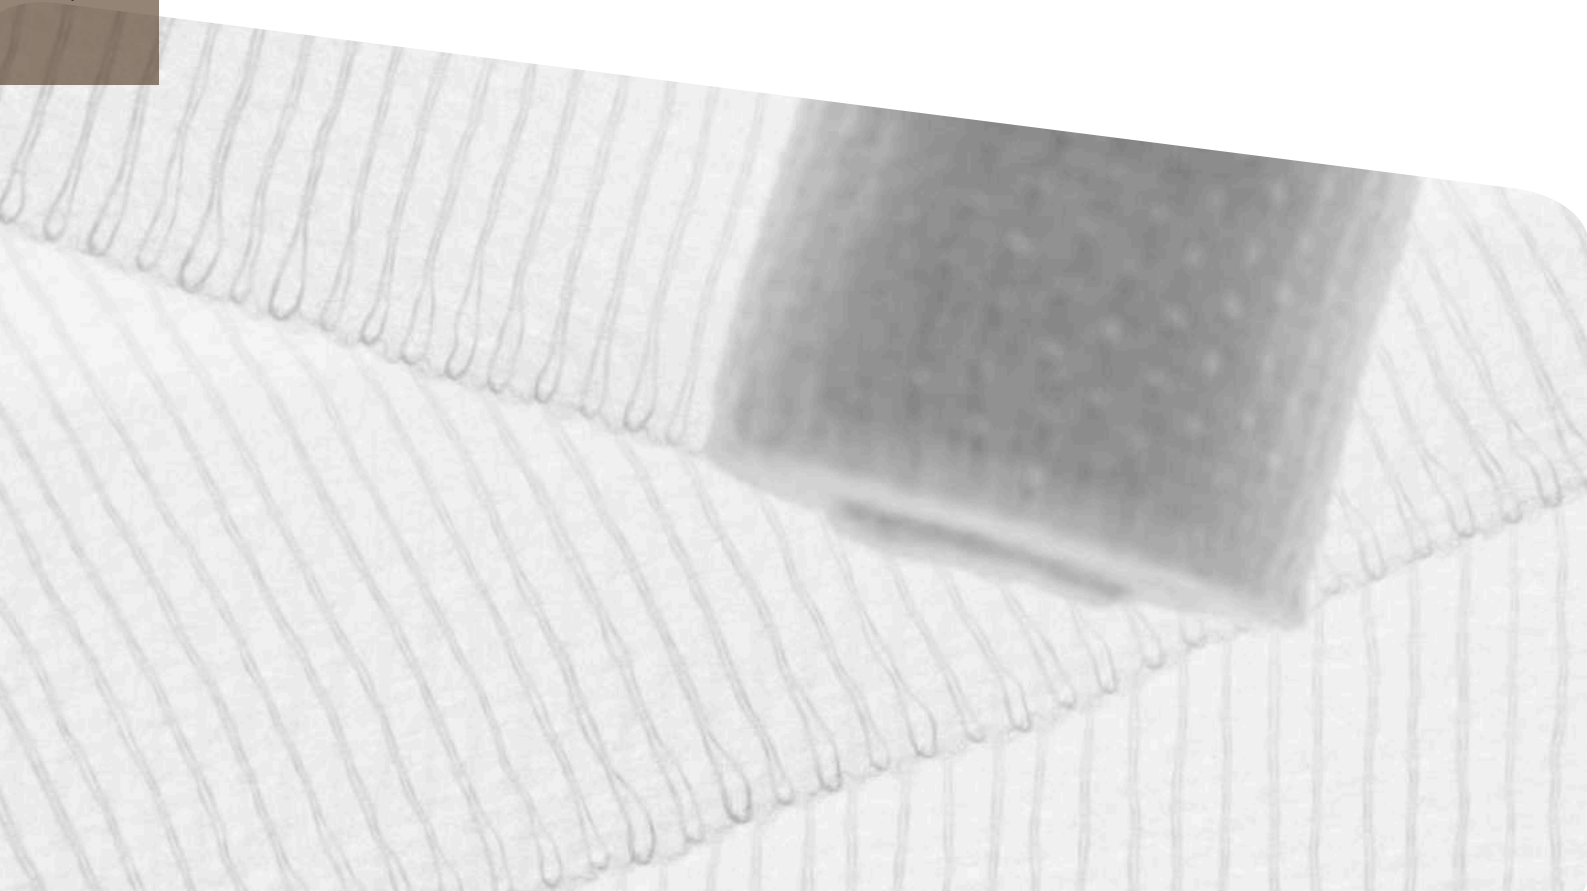

Side Woven Gauze is a specialized medical dressing with woven edges to prevent fraying during wound cleaning or packing. Its reinforced design ensures durability and ease of use, making it suitable for various wound care applications.

Composition 100% Cotton

Specification 5cm, 7.5cm, 10cm, 15cm, 20cm x 4.5m or custom

Product #

Benefits Prevents fraying, durable design ensures ease of use for wound cleaning and packing applications.

Cohesive Elastic Bandage Cotton

YD410

Cohesive Elastic Bandage Cotton is a self-adhering wrap used for compression and support in medical and sports settings. Its cohesive properties ensure secure fixation without the need for clips or fasteners, providing comfortable and effective compression therapy.

Composition Cotton and Elastic Fibre

Specification 2.5cm, 5cm, 7.5cm, 10cm, 15cm x 4m, 5m

Product #

Benefits Self-adhering wrap offers secure fixation, comfortable compression therapy without clips or fasteners.

Cohesive Elastic Bandage Non-Woven

YD420

Cohesive Elastic Bandage Non-Woven is a self-adhering wrap used for compression and support in medical and sports settings. Its cohesive properties ensure secure fixation without the need for clips or fasteners, providing comfortable and effective compression therapy.

Composition Non-woven fibres & elastic fibres

Specification 2.5cm, 5cm, 7.5cm, 10cm, 15cm x 4m, 4.5m

Product #

Benefits Self-adhering wrap offers secure fixation, comfortable compression therapy without clips or fasteners.

Elastic Adhesive Bandage

YD440

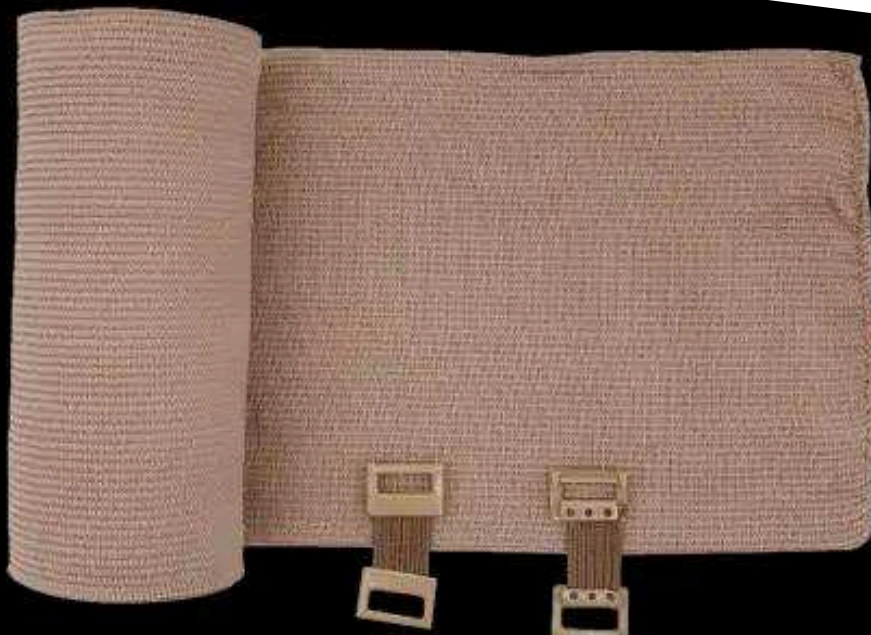

Elastic Adhesive Bandage is a versatile medical tape used for supporting injured muscles and joints during physical activity or rehabilitation. Its stretchable material ensures a secure fit, promoting effective recovery from sprains, strains, and other injuries.

Composition 99% Cotton, 1% hot melt glue with zinc oxide

Specification 2.5cm, 3.8cm, 5cm, 7.5cm x 4.5m or custom

Product #

Benefits Provides support, secure fit, aids in recovery from sprains, strains, and injuries effectively.

Kinesia Tape

YD430

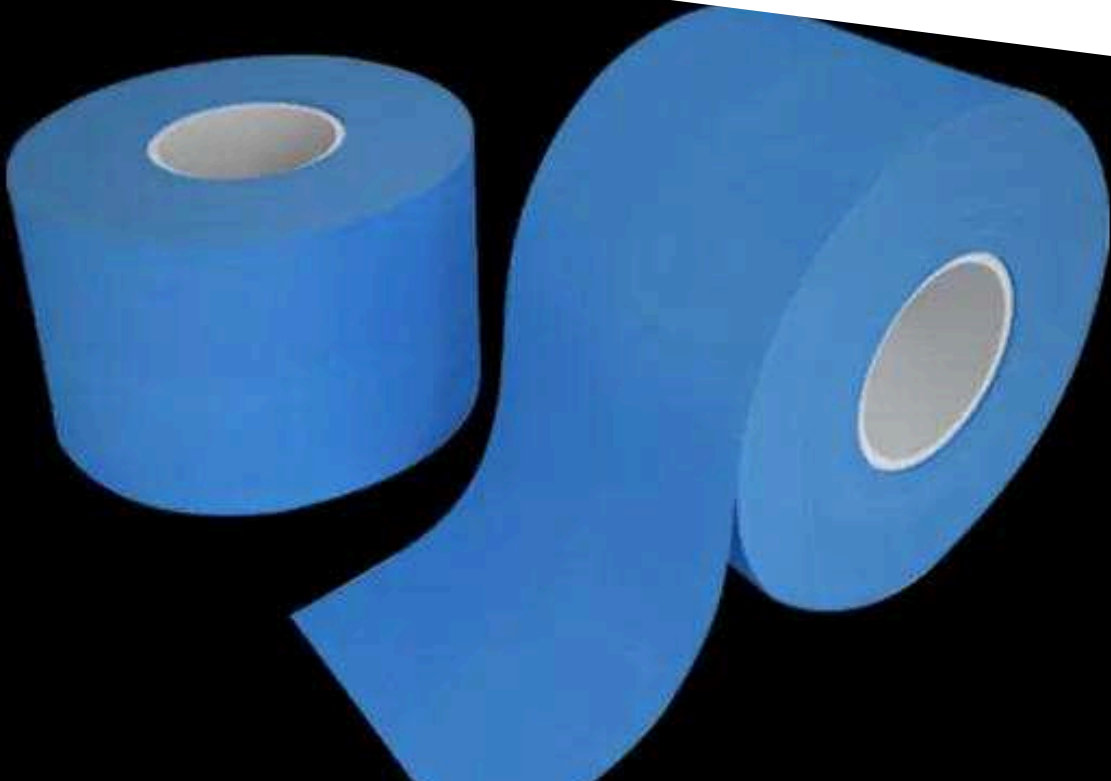

Kinesia Tape is a therapeutic tape used to support muscles and joints, enhancing performance and aiding in rehabilitation. Its elastic and adhesive properties promote improved circulation and pain relief, facilitating faster recovery and mobility during physical activity.

Composition 97% Cotton, 3% spandex and acrylic adhesive

Specification 2.5cm, 3.8cm, 5cm, 7.5cm, 10cm x 5cm or custom

Product #

Benefits Supports muscles and joints, improves circulation, aids pain relief, enhancing recovery and mobility.

Non-Woven Dressing

-

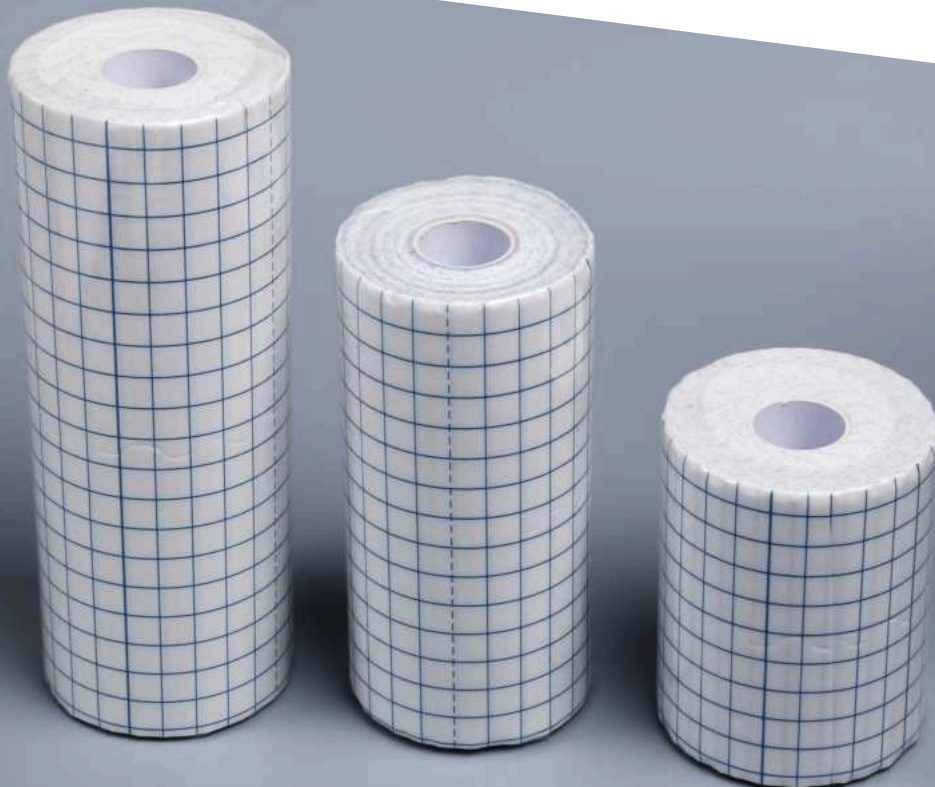

Non-Woven Dressing is a sterile medical pad used for covering and protecting wounds during healing. Its non-adherent and breathable design ensures comfort and minimizes trauma to the wound site, promoting optimal healing conditions.

Composition Non-Woven

Specification 10cm, 15cm, 20cm x 5m, 10m

Product #

Benefits Sterile, non-adherent, breathable design ensures comfort and promotes optimal wound healing conditions.

Non-Woven Dressing Pad

-

Non-Woven Dressing Pad is a sterile medical pad used for covering and protecting wounds during healing. Its non-adherent and breathable design ensures comfort and promotes optimal wound healing conditions.

Composition Non-Woven

Specification 6cm x 7cm, 10cm x 10cm, 10cm x 15cm, 10cm x 20cm, 10cm x 25cm,
10cm x 30cm

Product #

Benefits Sterile, non-adherent, breathable design ensures comfort and promotes optimal wound healing conditions.

Non-Adherent Pads

YD750

Non-Adherent Pads are sterile medical dressings designed to cover and protect wounds without sticking to the wound surface. Their non-stick properties minimize trauma during dressing changes, promoting comfort and supporting optimal wound healing.

Composition Cotton and non-woven

Specification 5cm x 7.5cm, 7.5cm x 10cm

Product #

Benefits Sterile dressings prevent sticking, minimize trauma during changes, promoting comfort and optimal wound healing.

Eye Pads

YD760

Eye Pads are sterile medical dressings designed to cover and protect the eye during injury or surgery. Their non-adherent and soft design ensures comfort and safety, providing effective protection for the delicate eye area.

Composition Non-woven

Specification 4.5cm x 6cm, 5.0cm x 7.5cm, 8.0cm x 6.0cm

Product #

Benefits Sterile, non-adherent, soft design ensures comfort and safety, providing effective protection for the delicate eye.

Multi-Layered Compression Bandage

Bandage

YD810

Multi-Layered Compression Bandage is a specialized medical wrap used for managing venous leg ulcers and lymphedema. Its multiple layers provide graduated compression, promoting venous return and reducing swelling for effective wound healing and edema control.

Composition A set of products

Specification -

Product #

Benefits Graduated compression promotes venous return, reduces swelling, aids wound healing, and edema control.

Bandage Packed Coloured

MS1001/MS1002/MS1003/MS1201/MS1202/MS1203
MS1301/MS1302/MS1303/MS1401/MS1402/MS1403
MS1501/MS1502/MS1503/MS1601/MS1602/MS1603

Multi-coloured bandages crafted from elastic material, available in custom sizes and packaging for personalized medical care.

Composition Elastic Bandages

Specification 5cm, 7.5cm, 10cm x *m

Product #

Benefits Custom sizes and packaging in different colours.

Non-Woven Tape

MA-001/MA-002/MA-003/MA-004/MA-005

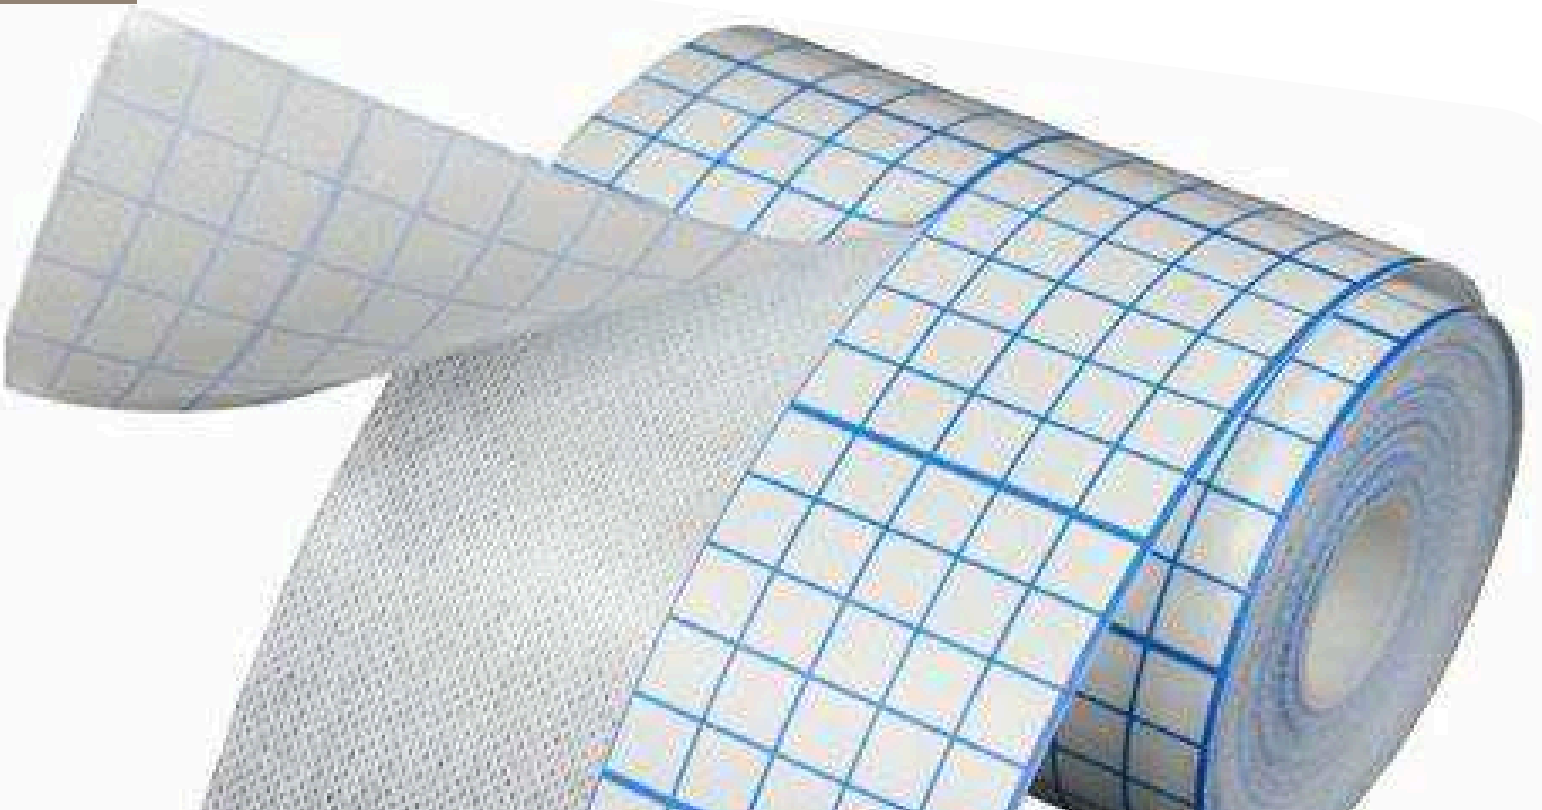

Non-woven tape offers gentle adhesion and easy removal, making it ideal for sensitive skin applications while providing reliable wound support and protection.

Composition Non-woven

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits The benefits of non-woven tape include its hypoallergenic properties, breathable nature.

Transparent Pe Tape

MA-006/MA-007/MA-008/MA-009/MA-010

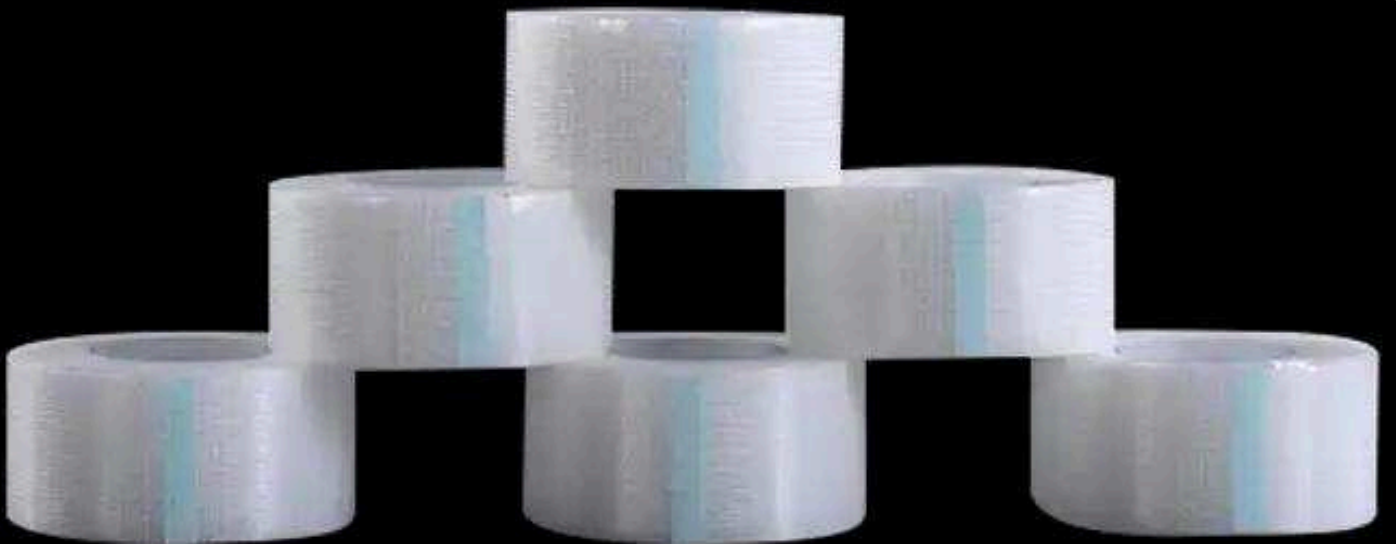

Transparent PE tape provides discreet wound coverage while allowing for easy monitoring of healing progress, making it suitable for delicate areas and frequent dressing changes with minimal disruption. Its waterproof and breathable design ensures reliable protection and comfort for extended wear.

Composition Polyethylene 99%, 1% Acrylate adhesive

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits PE tape offers transparent, waterproof, and breathable wound coverage.

Silk Tape

MA-011/MA-012/MA-013/MA-014/MA-015

Silk tape combines gentle adhesion with strong support, making it versatile for securing dressings and medical devices without causing irritation or skin trauma. Its hypoallergenic properties and conformable nature ensure comfortable application and removal, suitable for a variety of skin types and wound care needs.

Composition 99% silk, 1% adhesive

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits Include gentle adhesion, strong support, and hypoallergenic properties, ideal for comfortable and effective wound management.

Zinc Oxide Adhesive Tape Cotton

MA-016/MA-017/MA-018/MA-019/M-020

Zinc Oxide Adhesive Tape Cotton features a hypoallergenic adhesive that provides secure and gentle fixation for wound dressings and immobilization of joints. Its breathable cotton fabric ensures comfort and flexibility, making it suitable for long-term wear in orthopaedic and sports injury applications.

Composition 99% cotton, 1% zinc oxide

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits Includes secure fixation, hypoallergenic properties, and comfortable wear, ideal for effective wound management and joint support.

Zinc Oxide Adhesive Tape Cotton

MA-021/MA-022/MA-023

Zinc Oxide Adhesive Tape Cotton features a hypoallergenic adhesive that provides secure and gentle fixation for wound dressings and immobilization of joints. Its breathable cotton fabric ensures comfort and flexibility, making it suitable for long-term wear in orthopaedic and sports injury applications.

Composition 99% cotton, 1% zinc oxide

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits Includes secure fixation, hypoallergenic properties, and comfortable wear, ideal for effective wound management and joint support.

Zinc Oxide Plaster with cover

MA-032/MA-033/MA-034/MA-035/M-036

Zinc Oxide Plaster with a plastic cover combines the adhesive strength of zinc oxide with the added protection of a waterproof cover, ensuring secure and durable wound dressing in wet environments. Its versatile design allows for easy application and removal, making it suitable for both medical and household use.

Composition 99% cotton, 1% zinc oxide + plastic cover

Specification 1.25cm, 2.5cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits Include strong adhesion, waterproof protection, and ease of application, providing reliable wound dressing for various conditions.

Silk Zinc Oxide Perforated Plaster

MA-024/MA-025/MA-026/MA-027

Silk Zinc Oxide Perforated Plaster offers gentle yet effective adhesion, ideal for securing dressings and providing support for minor wounds and injuries. Its perforated design enhances breathability and reduces the risk of skin irritation, ensuring comfortable and hassle-free wear during extended periods of use.

Composition 99% cotton, 1% zinc oxide

Specification 10cm x 5m, 18cm x 5m

Product #

Benefits Gentle adhesion, enhanced breathability, and reduced skin irritation, making it an ideal choice for comfortable and effective.

Silk Zinc Oxide Perforated Plaster

MA-028/MA-029/MA-030/MA-031

Silk Zinc Oxide Perforated Plaster with tin casing offers convenient storage and portability, ensuring easy access to wound care supplies whenever needed. Its perforated design allows for airflow, promoting optimal healing, while the durable tin casing provides protection for the plaster, making it suitable for on-the-go use.

Composition 99% cotton, 1% zinc oxide in a tin casing

Specification 1.25cm, 2.5cm, 5cm, 7.5cm x 5m

Product #

Benefits The tin casing includes portability, enhanced airflow for optimal healing, ensuring effective wound care anytime, anywhere.

PU Non-Woven Fixing Tape

MA-032/MA-033/MA-034/MA-035/MA-36/MA-37

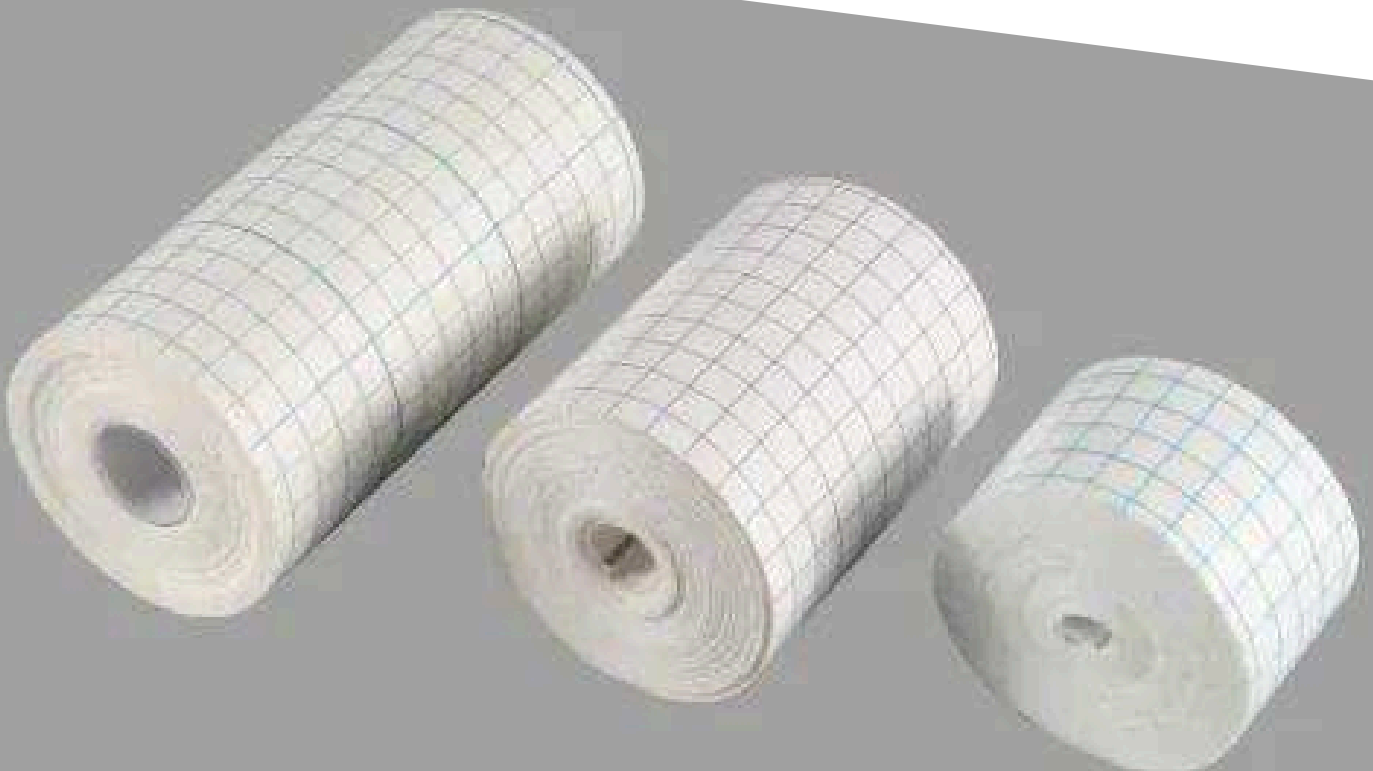

PU Non-Woven Fixing Tape provides gentle yet secure adhesion for dressings and medical devices, offering comfort and flexibility during wear. Its non-woven construction allows for breathability and hypoallergenic properties, making it suitable for sensitive skin types and prolonged use.

Composition Polyurethane and non-woven fabric

Specification 5cm, 10cm, 15cm, 20cm, 25cm, 30cm x 10m

Product #

Benefits Gentle adhesion, breathability, and hypoallergenic properties, ensuring comfortable and effective wound dressing for sensitive skin.

PU Non-Woven Fixing Tape

MA-032/MA-033/MA-034/MA-035/MA-36/MA-37

PU Non-Woven Fixing Tape provides gentle yet secure adhesion for dressings and medical devices, offering comfort and flexibility during wear. Its non-woven construction allows for breathability and hypoallergenic properties, making it suitable for sensitive skin types and prolonged use.

Composition Cotton, adhesive

Specification 2.5cm, 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Gentle adhesion, breathability, and hypoallergenic properties, ensuring comfortable and effective wound dressing for sensitive skin.

Kinesiology Tape

S-006/S-007/S-008/S-009/S-010

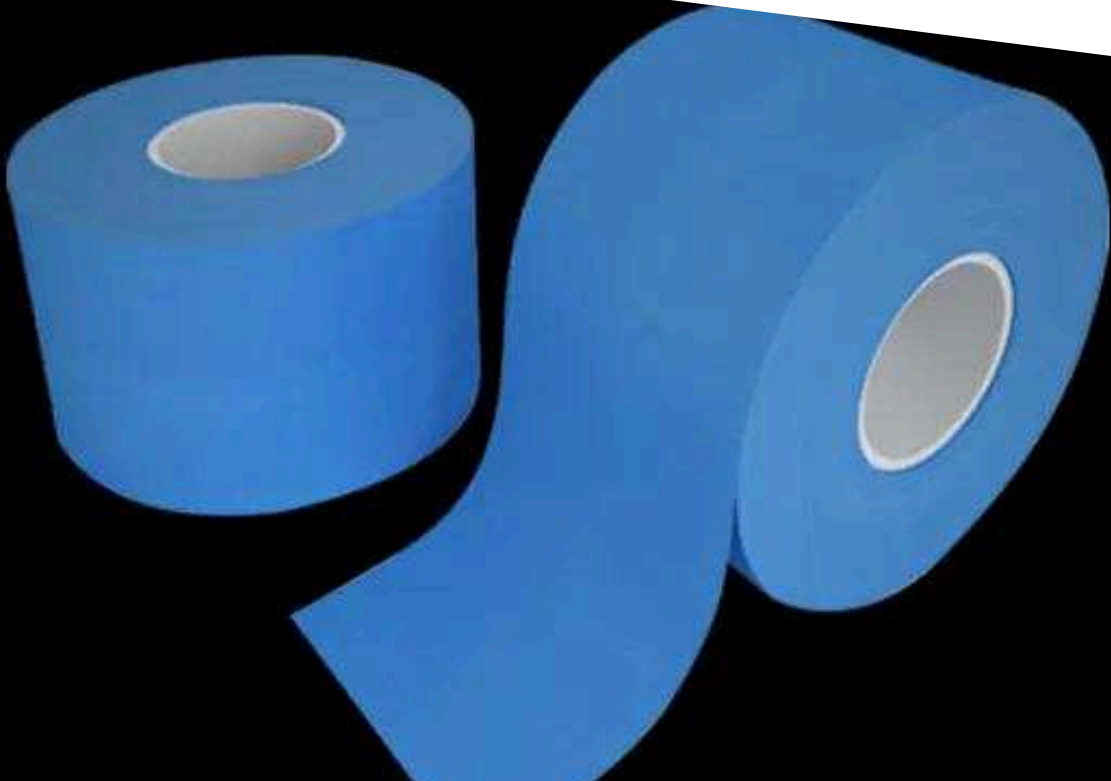

Kinesiology Tape is designed to support muscles and joints while allowing for a full range of motion, making it ideal for athletic performance and rehabilitation. Its elastic and adhesive properties promote improved circulation and pain relief, enhancing recovery and mobility during physical activity.

Composition 99% Cotton, 1% Elastic Fibre

Specification 2,5cm, 3,8cm, 5cm, 7.5cm, 10cm x 5m

Product #

Benefits Enhanced support for muscles and joints, improved circulation, and pain relief, better performance and recovery during physical activities.

Sports Tape Cotton

S-011/S-012/S-013/S-014

Sports Tape Cotton provides reliable support and stability for joints and muscles during physical activities, aiding in injury prevention and rehabilitation. Its breathable and durable cotton construction ensures comfortable and secure application, making it suitable for athletes and active individuals.

Composition 99% Cotton, 1% Adhesive

Specification 2.5cm, 3.8cm, 5cm, 7.5cm x 13.7m

Product #

Benefits Reliable support, comfort, and durability, offering effective injury prevention and rehabilitation for athletes and active individuals alike.

EAB Tape Cotton

S-015/S-016/S-017/S-018/S-019/S-020/S-021/S-022

EAB Tape Cotton offers strong and flexible support for joints and ligaments during sports activities or rehabilitation exercises. Its adhesive properties ensure secure fixation without restricting movement, providing reliable injury prevention and support.

Composition 99% Cotton, 1% adhesive fibre

Specification 5cm, 7.5cm, 10cm, 15cm x 3m or 4.5m

Product #

Benefits Strong support and flexibility, aiding in injury prevention and rehabilitation for athletes and individuals with active lifestyles.

Elastic Bandage

S-023/S-024/S-025/S-026

Elastic Bandage provides gentle compression and support for strains, sprains, and other minor injuries, promoting faster recovery and reducing swelling. Its flexible and breathable material allows for comfortable wear during physical activity, ensuring optimal comfort and mobility.

Composition 80% Cotton, 20% Spandex

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Gentle compression, support for minor injuries, and comfortable wear, aiding in faster recovery and improved mobility.

PBT Bandage Woven Edges

S-027/S-028/S-029/S-030

PBT Bandage with woven edges offers reliable compression and support for sprains, strains, and other minor injuries, promoting effective healing and reduced swelling. Its woven edges prevent fraying and ensure secure fixation, providing long-lasting support during recovery and rehabilitation.

Composition Viscose 45%, polyester 55%

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Reliable compression, secure fixation, and effective support for minor injuries, facilitating optimal healing and comfort during recovery.

Crepe Bandage

S-031/S-032/S-033/S-034

Crepe Bandage offers moderate compression and support for sprains, strains, and joint injuries, aiding in pain relief and stabilization during recovery. Its stretchable and breathable fabric ensures a comfortable fit and easy application, making it suitable for various medical conditions and first aid situations.

Composition Cotton 80%, Spandex 20%

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Moderate compression, comfortable fit, and versatile application, provide effective support and pain relief for various injuries.

High Elastic Bandage

S-035/S-036/S-037/S-038

High Elastic Bandage offers strong and flexible compression for supporting injured muscles and joints, aiding in pain relief and stabilization during rehabilitation. Its stretchable fabric provides a snug fit without restricting movement, making it suitable for athletes and individuals recovering from injuries.

Composition Polyester 85%, 15% Rubber

Specification 5cm, 7.5cm, 10cm, 15cm x 4.5m

Product #

Benefits Strong compression, flexible support, and unrestricted movement, facilitate effective pain relief and stabilization during rehabilitation and physical activity.

Raw Materials Jumbo Roll

J-001/J-002/J-003/J-004/J-005/J-006/J-007/J-008/J-009

Raw Materials Jumbo Roll offers bulk quantities of essential components used in manufacturing adhesive tapes, serving as a cost-effective solution for businesses to produce customized tapes such as Silk, Zinc Oxide, and Kinesiology. Its availability in bulk streamlines tape production processes, ensuring consistent quality and supply for various applications.

Suction Catheter

GNG-001

A Suction Catheter is a flexible tube used to remove secretions, blood, or other fluids from the airway or body cavities, aiding in respiratory and medical procedures. Its design allows for controlled suctioning, ensuring effective removal of debris while minimizing discomfort for patients.

Composition Plastic

Specification From 4FR to 20FR x 50cm

Product #

Benefits Effective removal of secretions and fluids, aiding in respiratory and medical procedures, while ensuring patient comfort and safety.

Nelaton Catheter

GNG-002

A Nelaton Catheter is a flexible tube used for urinary catheterization, facilitating the drainage of urine from the bladder in medical settings. Its smooth and tapered design allows for gentle insertion and comfortable use, ensuring patient comfort and hygiene during catheterization procedures.

Composition Plastic

Specification From 4FR to 20FR x 40cm

Product #

Benefits Gentle insertion, effective urine drainage, and patient comfort, making it a valuable tool for urinary catheterization procedures.

Rectal Catheter

GNG-003

A Rectal Catheter is a medical device used for administering enemas or medications, facilitating bowel evacuation or treatment of certain conditions. Its soft and flexible design ensures comfortable insertion and effective delivery of substances into the rectum, enhancing patient care in healthcare settings.

Composition Plastic

Specification From 22FR to 36FR x 40cm

Product #

Benefits Administration of enemas or medications, optimizing bowel evacuation and treatment efficacy for patients in medical care.

Stomach Tube

GNG-004

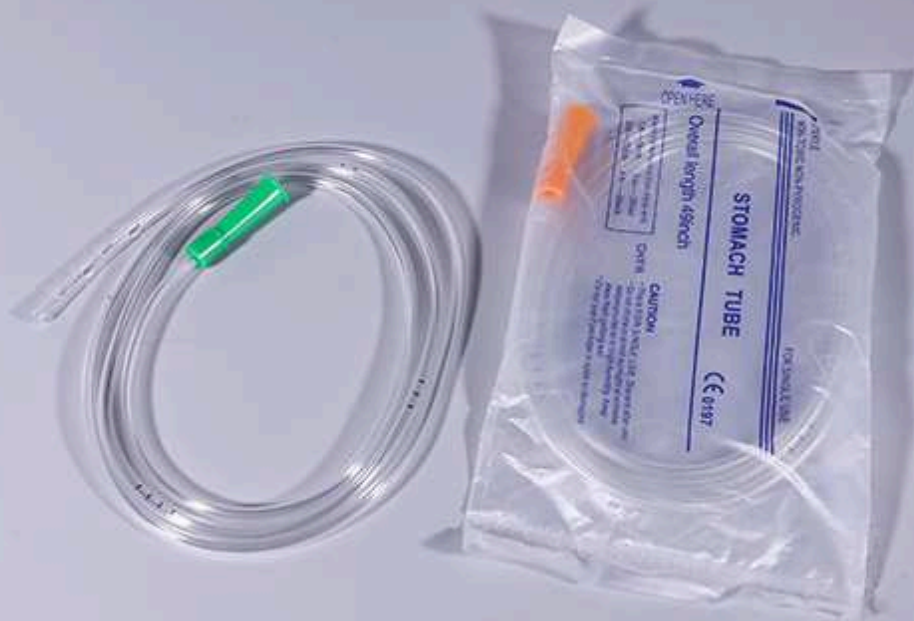

A Stomach Tube is a medical device used for delivering nutrition, medication, or removing gastric contents directly from the stomach. Its flexible design allows for safe and efficient insertion, enabling essential treatment and support for patients with feeding or gastrointestinal needs.

Composition Plastic

Specification 4FR to 20FR x 120cm

Product #

Benefits Efficient delivery of nutrition and medication directly to the stomach, supporting patient nourishment and gastrointestinal management.

Feeding Tube

GNG-005

A Feeding Tube is a medical device used to deliver nutrition directly into the gastrointestinal tract when oral intake is not possible. Its flexible and sterile design ensures safe and efficient feeding, supporting patient nutrition and recovery in healthcare settings.

Composition Plastic

Specification 4FR to 20FR x 40cm or 120cm

Product #

Benefits Providing essential nutrition directly into the gastrointestinal tract, supporting patients unable to consume food orally.

Mucus Suction Set

GNG-006

A Mucus Suction Set is a medical device used to remove mucus or other secretions from the respiratory tract to facilitate easier breathing for patients. Its sterile components and adjustable suction levels ensure safe and effective suctioning, promoting respiratory comfort and health in medical environments.

Composition Plastic

Specification 6FR to 16FR

Product #

Benefits Aids in clearing respiratory secretions, promoting easier breathing and improved comfort for patients in medical care.

Disposable Connecting Tube

GNG-007

A Disposable Connecting Tube is a single-use medical device designed to connect various medical equipment, such as catheters or drainage bags, to ensure safe and hygienic procedures. Its sterile construction reduces the risk of contamination, providing reliable connectivity for medical interventions while minimizing infection risks.

Composition Plastic

Specification ? x 180cm

Product #

Benefits Hygienic and secure connections between medical equipment, minimizing contamination risks and enhancing patient safety during procedures.

Disposable Oxygen Mask

GNM-001

A Disposable Oxygen Mask is a medical device used to deliver oxygen to patients with respiratory conditions or during medical procedures. Its lightweight and adjustable design ensures comfortable and efficient oxygen delivery, facilitating improved breathing and patient care in clinical settings.

Composition Plastic

Specification Custom mask sizes, 5mm x 200cm

Product #

Benefits Delivers oxygen efficiently, ensuring improved breathing and comfort for patients with respiratory conditions.

Non-Rebreathing Oxygen Mask

GNM-002

A Disposable Nebulizer Mask is a medical device used to deliver aerosolized medication to patients with respiratory conditions. Its flexible design and comfortable fit ensure efficient medication delivery, facilitating improved respiratory function and patient comfort during nebulization therapy.

Composition Plastic

Specification Custom mask sizes, 5mm x 200cm

Product #

Benefits Efficient medication delivery, comfortable fit, improving respiratory function and patient comfort during nebulization therapy.

Disposable Nasal Oxygen Cannula

GNM-003

The Disposable Nasal Oxygen Cannula is a medical device used to deliver oxygen directly to patients' noses, ensuring optimal oxygenation. Its flexible and lightweight design provides comfort for both minors and adults, facilitating improved respiratory support in clinical settings.

Composition Plastic

Specification 5mm x 200cm

Product #

Benefits Comfortable oxygen delivery for minors and adults, ensuring optimal respiratory support in clinical settings.

Urine Bag

GNN-001/GNN-002/GNN-003/GNN-004/GNN-005/GNN-06
GNN-007/GNN-008/GNN-009/GNN-010/GNN-011

Urine Bags are available with standardized compartments or can be custom-made to meet specific patient needs and medical requirements. Whether standard or custom, they provide secure and hygienic collection of urine, ensuring patient comfort and healthcare efficacy.

Composition Plastic

Specification Custom or Standard liquid compartments

Product #

Benefits Custom or standard compartments offer secure, hygienic urine collection, ensuring patient comfort and healthcare efficiency.

Disposable Enema Bag

GNQ-001

A Disposable Enema Bag is a medical device used for administering enemas to patients for bowel evacuation or treatment purposes. Its sterile and user-friendly design ensures safe and effective enema delivery, facilitating bowel management and patient comfort in medical settings.

Composition Plastic

Specification 1500ml, 1750ml, 2000ml x 150cm

Product #

Benefits Sterile and user-friendly, facilitates safe and effective enema delivery for bowel management and patient comfort.

Disposable Feeding Bag

GNQ-002

A Disposable Feeding Bag is a medical device used to deliver liquid nutrition directly into the gastrointestinal tract, supporting patients who cannot consume food orally. Its sterile and easy-to-use design ensures safe and hygienic feeding, promoting patient nourishment and healthcare efficacy.

Composition Plastic

Specification 1500ml, 1750ml, 2000ml x 150cm

Product #

Benefits Safe, sterile, and easy-to-use, supporting liquid nutrition delivery for patients unable to eat orally.

Infusion Sets

IV-01/IV-02/IV-03/IV-04/IV-05

IV-06/IV-07/IV-08/IV-09/IV-10

Infusion Sets are medical devices used to deliver fluids, medications, or nutrients directly into the bloodstream of patients. Typically, they include components such as a drip chamber, tubing, and a needle or catheter for insertion into a vein, ensuring safe and controlled administration of fluids or medications.

Composition Metal, Plastic

Specification Custom sizes and set composition

Product #

Benefits Precise fluid delivery, ensuring safe administration of medications and nutrients directly into patients' bloodstream.

PPE Overall

PPE Overall is protective clothing worn to minimize exposure to hazards in various work environments, safeguarding against contaminants and injuries. Its durable construction and full-body coverage ensure comprehensive protection, promoting safety and peace of mind for workers.

Composition polypropylene, polyester, or cotton blends

Specification Custom sizes and set composition

Product #

Benefits Comprehensive protection, comfort, and peace of mind, ensuring safety in various work environments.

PPE Gown

-

PPE Gown is protective attire worn to shield healthcare workers and patients from contamination in medical settings. Its fluid-resistant design and full-body coverage provide a barrier against pathogens, ensuring safety during procedures and patient care.

Composition polypropylene, polyester, or cotton blends

Specification Custom sizes and set composition

Product #

Benefits Protection from contamination and pathogens, ensuring safety during medical procedures and patient care.

PPE Shoe Covers

-

PPE Shoe Covers are protective garments worn over shoes to prevent the spread of contaminants in healthcare and industrial settings. Their disposable and non-slip design provides an additional barrier, ensuring hygiene and safety in sensitive environments.

Composition polypropylene, polyester, or cotton blends

Specification Custom sizes and set composition

Product #

Benefits Preventing the spread of contaminants and maintaining hygiene in healthcare and industrial environments.

PPE Hair Net

-

PPE Hair Net is a protective accessory worn to prevent hair from contaminating food or sensitive work areas in industries like food processing or healthcare. Its lightweight and breathable design ensure comfort while maintaining hygiene standards, promoting safety and cleanliness in the workplace.

Composition polypropylene, polyester, or cotton blends

Specification Custom sizes and set composition

Product #

Benefits Preventing hair contamination and maintaining hygiene standards, promoting safety and cleanliness.
